

Checklist of checkpoints for Exercise step guidelines

This document is an appendix to the FutureLearn [Partners site technical standards and guidelines on exercise steps](#). It provides a checklist of all points from the Partner guidelines, organised by concept, presented as a checklist for developers. This list may be used to review an exercise step for suitability for inclusion on Futurelearn.

For each checkpoint, indicate whether or not the guideline has been satisfied, not satisfied or not applicable.

Guidelines	Yes	No	N/A
Security			
Is all content served over SSL/HTTPS?			
Accessibility			
Can you navigate through all of the content using only the keyboard?			
Is the currently focussed element clearly highlighted?			
Can you view or scroll to all of the content on:			
A small screen (e.g. a smartphone) in landscape mode?			
A small screen in portrait mode?			
A medium screen (e.g. a tablet) in landscape mode?			
A medium screen in portrait mode?			
A large screen (e.g. a laptop or desktop computer)?			
Please note for the above, if you do not have devices available to test on, you can simulate the experience by making your browser window approximately the right size while testing.			
Are all hit areas on mobile larger than 7-10mm?			
Is all text presented at a font-size of 14px or above?			
If the exercise is not supported by all browsers or technologies:			
Have you provided a text-only or other fallback measure for unsupported browsers?			
Have you explained any fallback measures in the step content? (e.g., if JavaScript or a modern browser is required it must be stated up front)			
General			
Have you implemented scrolling if you need it?			
Have you made sure not to use any framebusting code?
